

TO THE PEOPLES OF THE WORLD

The great guaranteed world peace to which all the populations of the globe aspire cannot only be a political slogan concept, but a reality towards which the world of the 21st century is inevitably heading.

This is the next stage in the constant evolution of planet earth, what United Nations and Religions, World Organization calls the Cosmopolitization of physical and biological Humanity.

However, must the inhabitants of the earth decide whether they will achieve this Peace by taking the paths paved with inconceivable honors born from the tenacious attachment of the world, a large global village, to other decadent and complementary systems? retrogrades of good by spontaneously adopting for an affirmation of joint will of the world's peoples.

At this critical moment when the very difficult problems afflicting the world have become a common concern for the entire planet earth and where it would be extremely irresponsible not to take the measures required to stop the numerous conflicts and wars.

However, in this abiotic moment when the winds of despair are unfortunately blowing from all directions of planet earth and the quarrels that divide and afflict physical and biological Humanity are getting worse every day.

The deep sense of political and moral duty and the responsibility of cosmopolitan citizenship pushes me at this opportune moment given the necessity and urgency to give you the exhaustive list of words, systems and organizations that the United Nations and Religions, World Organization identifies as brings bad luck to the world in particular;

The State, legal person or individual.

Religion.

Western-style or representative democracy.

International law.

Human rights.

The international community.

The United Nations with all its related institutions.

The Security Council.

Racism.

The war.

Weapons.

The Western Atlantic.
Terrorism in all its forms.
Zionism.
The American Administration.
The absolute sovereignty of the State.
The International Criminal Court.
The World Bank.
The IMF.
The G7.
Sanction or Embargo.
Impunity.
Homosexuality.
The Reason of State.

Politics.
Unilateralism.
The privileges of esteem.
Bilateral diplomacy.
The media.
These words, systems and organizations are the cancerous viruses that have put physical and biological Humanity in a state of deplorable putrefaction.
